The Magic of Sunsets: There's something truly magical about watching the sun dip below the horizon, painting the sky with hues of orange, pink, and purple. Sunsets remind us to slow down and appreciate the fleeting moments of beauty in our lives.The Magic of Sunsets: There's something truly magical about watching the sun dip below the horizon, painting the sky with hues of orange, pink, and purple. ## Majestic Mountains

A black hole is a place in space where gravity pulls so much that even light can not get out. The gravity is so strong because matter has been squeezed into a tiny space. This can happen when a star is dying. Because no light can get out, people can't see black holes. They are invisible. There are likely millions of black holes in our galaxy, and we will probably never know where they are. .... If you fell into a black hole, you would never escape. ... If you fell into a stellar-size black hole, you could turn into human spaghetti. .... A black hole could fit in your pocket.
